

- Radio Frequency motor is concealed inside the headrail.
- Shades are programmed at the factory with “up and down” limits. “Favorites” position can be set after install.
- Shade motors are unplugged from the battery to prevent operation during shipping. Each motor must be connected to battery before installation.
- Rechargeable battery, for standard bottom up and top down/bottom up over 36", is hidden inside the headrail. Charging port on the back of the headrail.
- Top Down / Bottom Up shades under 36" wide will have an external battery pack which requires a minimum mounting depth of 2 3/4".
- **A charger is required.** Order at least one charger.
- Average battery life is 6-9 months based on average size shade and daily use.
- The battery can be recharged up to 500 times.  
Takes approximately 5 hours to fully recharge.
- Windows with metal casing may reduce radio frequency range or cause interference with operation.  
Do not let the antenna touch any metal objects.
- Available top or back mount using standard Cordless Shade installation brackets.
- Motorization cannot be combined with any specialty applications such as angles or arches.
- **5 Channel Remote** (available in white or black) can operate up to five shades, individually or 5 groups. Includes holder that can be mounted to the wall. Range of approximately 80 feet.
- **6 Channel Timer Remote** combines functionality of 6 channel hand-held control with convenience of a programmable timer. Allows for 18 different scheduled actions. Manual function disables the timer, then operates as a remote. Includes holder that can be mounted to the wall. Range of approximately 80 feet.
- Remotes use 3V battery; included.
- Optional **Smart Controller** works with Apple and Android devices. Free downloadable APP.  
Connects to WiFi and send signals to your shades. Range of about 150 feet.  
Powered by NEO Smart Blinds App.
